

Warm Front grants

Over 1.7 million homes have been supported by **Government Warm Front grants since 2000**, enabling homeowners to make heating improvements to their homes. Now, more funds have been made available to help those homeowners who didn't qualify first time round.

What is Warm Front?

Warm Front is the Government's largest scheme designed to combat fuel poverty in privately owned and rented homes in England.

£300 heating rebate scheme

If you have not previously qualified for a Warm Front grant, you may now still be eligible for a £300 rebate. Available to all householders over 60, who either own their own home or rent from a private landlord, with no central heating, or one which does not work properly.

If you have previously received a Warm Front Grant, you may now re-apply for further measures such as top-ups to your loft insulation, heating repairs and boiler replacements.

For more information visit www.warmfront.co.uk or call **0800 316 2805** to speak to an advisor.

Heating fact

Turning your thermostat down by 1°C could **cut your heating bills by up to 10%***
