

Flat Plate Solar Collector - just add daylight

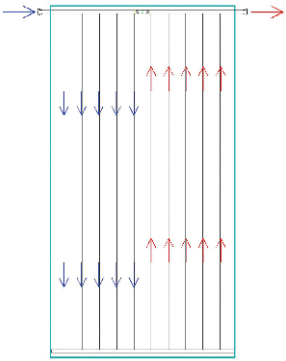

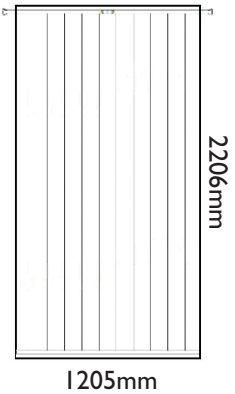

Features of Vertical/In-Roof Solar Collector OR25/L

- High efficiency with European Solar Keymark
- Quick installation
- The ideal solution for every roof
- Robust and resilient construction
- Low heat loss achieved with high insulation levels
- Toughened low iron glass
- High quality materials ensure a long life

Reduce your fuel bills with a solar collector

Vertical & Horizontal On-Roof Collector OR25/L

Horizontal or vertical collectors with flexible mounting sets are ideal for on-roof or free-standing installations. This attractive and high performance collector has a high durability which makes it one of the best collectors of its type.

Vertical & Horizontal On-Roof Solar Collector OR25/L		Specification	
		Name	OR25/L
		Installation type:	Vertical/Horizontal On-Roof/Free-standing
		Size:	2206mm x 1205mm x 100mm
		Weight:	55kg
		Gross collector surface area:	2.65 m ²
		Nett collector surface area:	2.35 m ²
		Absorber surface area:	2.31 m ²
		Absorber surface dimension:	2101mm x 1000mm
		Absorption:	95%
		Emission:	5%
Recommended flow range:	15-40 l/h/ per m ²		
Maximum operating pressure:	10 bar		
Heat insulation:	Real wall 50mm mineral wool, edge insulation 20mm mineral wool		
Collector glazing:	4mm toughened low iron glass
